

NAS NORTH ISLAND - NAVY REGION SOUTHWEST NAVY ENVIRONMENTAL LEADERSHIP PROGRAM

POLLUTION PREVENTION

POLLUTION PREVENTION PLAN PROTOTYPE

LEAD ACTIVITY

Naval Air Station (NAS) North Island

STATUS

Completed

MISSION

Develop prototype pollution prevention (P2) plan

DESCRIPTION

On November 19, 1993, Chief of Naval Operations (CNO) (N45) requested that NAS North Island and Naval Station (NAVSTA) Mayport assist in producing P2 plans for use as prototypes at other naval commands (Aircraft Intermediate Maintenance Department [AIMD], Aircraft Squadrons, Supervisor of Ship Maintenance). In 1995, CNO distributed the NAS North Island P2 plan prototype to 349 other Navy shore activities to assist them in development of activity specific P2 plans. This was one of many NELP export successes.

The P2 plan presents NAS North Island's P2 policy; the P2 plan's applicability and scope (including P2 goals); NAS North Island installation information; management and administrative elements; planned process-specific improvements; P2 priorities; installation-specific potential barriers to P2; other requirements; and the Commanding Officer's statement and approval.
